

*Give the world the key to access your service, your product,  
your ideas, information...your business using the right technology*

**Imalnet** A Full Service Computer Consulting Company

949.215.0027 | F: 206.984.0944 | [www.Imalnet.Com](http://www.Imalnet.Com)

**Imalnet** is a full service on-site computer, LAN, WAN and peripherals design, installation and maintenance business. We are experienced in diagnosing and repairing computers and peripherals efficiently in less time and that way it will save you many costly hours. When you are looking for a company who is able to design your network and maintain it, than **Imalnet** is the right company for you.

As your needs grow or change we will be there to help you with your upgrades, expansion, or move to another location. Our trained service technicians are on the job to get you up and running with as little "down time" as possible.

**Imalnet** has successfully worked with small companies to those with the large IT staff. For clients with IT staff, Imalnet works directly with your IT staff to make their job easier and to provide support. We act as your product research department, as your backup staff during vacations/sickness, and provide you with support during any possible crisis. Smaller clients who are without a dedicated technology staff are provided all of the same services as those who have otherwise. Imalnet has the services you need: design of your network, installation of your PCs, or consulting with Advisory Board.

Our role is to assist you in moving your business forward. Computer technology is a tool that in the right hands will assist you in making your business run efficiently. Make your technology work for you instead of you constantly working on your technology. We are here for you and if you have any questions please feel free to give us a call.
